

## Job description

You are a great visual designer. You have a passion to build stunning user interfaces that also create a great experience for the user. You have prior experience with interaction design and you have previous work that can show this. You've designed for mobile and are familiar with the constraints and possibilities that it encapsulates.

You are able to create prototypes, designing high-fidelity mock-ups and other deliverables for use in the development cycle. You are at ease communicating your ideas with the rest of the team. You not only are able to receive, but can also give out useful feedback that helps point other team members in the right direction.

## Responsibilities

- Design the user model and user interface for all products and websites
- Develop lightweight and high level detailed storyboards, mock-ups and prototypes
- Carry design from ideation and wireframes all the way through solid HTML, CSS
- Find ways to make complex information and interaction simple and elegant
- Design navigational hierarchies and visualize key concepts of site structure and user paths
- Concept interactions across mediums: web, mobile and email
- Work directly with our team of developers and designers to insure we maintain a high-quality user experience
- Handle day to day graphic task requests (banners, icons, newsletters)

## Desired Skills and Experience

- Degree in Graphic Design (You have the talent level that can be found at [dribbble.com](https://dribbble.com))
- Strong creative and graphic design skills with a pixel-perfect portfolio of attractive web and mobile application designs
- 3+ years experience designing great user experiences for desktop and 1+ year for tablet and mobile environments
- A strong understanding of user-centered design principles and knowledge of current design and interaction trends
- Capable of seeing a project through from initial design to conception
- Knowledge of UI languages, devices and technologies

- Solid understanding of HTML and CSS at the code level to appreciate how code affects design and vice versa
- Ability to prioritize and adhere to critical project timelines in a fast-paced environment
- Highly proficient in Photoshop and Illustrator
- Excellent written and verbal communication skills
- Ability to perform usability testing, distill key issues from usability tests, communicate results and recommend practical solutions

## What's next?

If you meet the requirements listed above, we would love to learn more about you.

Send us your resume and your portfolio URL complete and a brief description of your involvement in each project at: [jobs@vmn.net](mailto:jobs@vmn.net). Please do not provide screenshots for materials you didn't design 100% yourself.

# About Visicom Media

Founded in 1996, Visicom Media is a market leader in browser-based technologies.

We develop tools, platforms and software products for large publishers and partners such as Yahoo!, Comcast, Verizon, Time Warner and Panda Security.

**We strive to innovate**  
**We love to create**
